

TASK 2 – HEALTH QUIZ APPLICATION

Description:

Developed an interactive health quiz application using HTML, CSS, JavaScript, and Bootstrap as part of the internship task. The application asks users health-related questions and displays results based on their responses. The project is designed with a clean and responsive user interface for better user experience.

Technologies Used:

- HTML5
- CSS3
- JavaScript
- Bootstrap

Features:

- Responsive Design
- Interactive Quiz Interface
- Multiple Health-Related Questions
- Score Calculation
- Dynamic Result Display
- User-Friendly Layout
- Mobile-Friendly Design

Project Workflow:

1. Designed the quiz structure using HTML.
2. Styled the application using CSS and Bootstrap.
3. Added quiz functionality and score calculation using JavaScript.
4. Displayed results dynamically based on user answers.
5. Tested the application responsiveness and functionality.
6. Uploaded the project to GitHub.

Learning Outcomes:

- Improved JavaScript logic-building skills.

- Learned dynamic content handling.
- Gained experience in responsive frontend development.
