

TASK 1 – PORTFOLIO WEBSITE

Description:

Developed a responsive personal portfolio website using HTML, CSS, and JavaScript, Bootstrap as part of the internship task. The website showcases personal information, technical skills, projects, and contact details with a clean and modern user interface.

Technologies Used:

- HTML5
- CSS3
- JavaScript

Features:

- Responsive Design
- Smooth Navigation
- About Me Section
- Skills Section
- Project Showcase
- Contact Section
- Mobile-Friendly Layout

Project Workflow:

1. Designed the webpage structure using HTML.
2. Styled the website using CSS.
3. Added interactivity using JavaScript.
4. Tested responsiveness on different devices.
5. Uploaded the project to GitHub.

Learning Outcomes:

- Improved front-end development skills.
- Learned responsive web design.
- Gained experience in project hosting using GitHub.
